Volume 1

Whole volume

Volume 3

3.01 - Radiation Effects in Zirconium Alloys (Fabien Onimus, Sylvie Doriot and J.-L. Béchade - Pages 1-56)

3.02 - Radiation-Induced Damage in Austenitic Structural Steels Used in Nuclear Reactors (Frank A. Garner - Pages 57-168)

3.05 - Radiation Effects in Ferritic Steels and Advanced Ferritic-Martensitic Steels (Naoyuki Hashimoto, Ryuta Kasada, ... M. Vijayalakshmi - Pages 226-254)

3.06 - Oxide Dispersion Strengthened Steels (Shigeharu Ukai, Naoko Oono-Hori and Satoshi Ohtsuka - Pages 255-292)

3.07 - Radiation Effects in FeCrAl Alloys for Nuclear Power Applications (Kevin G. Field and Samuel A. Briggs - Pages 293-306)

3.09 - Radiation Effects in Nickel-Based Alloys (Malcolm Griffiths and Robin Boothby - Pages 334-371)

3.10 - Radiation Effects in Refractory Metals and Alloys (Keith J. Leonard and Chase N. Taylor - Pages 372-397)

3.11 - Radiation Effects in Graphite (Anne A. Campbell and Timothy D. Burchell - Pages 398-436)

3.12 - Radiation Effects in SiC and SiC-SiC (Lance L. Snead, Yutai Katoh and Takashi Nozawa - Pages 437-461)

3.15 - Welds for Nuclear Systems (George A. Young, Micah J. Hackett, ... Thomas E. Capobianco - Pages 517-544)

3.16 - Polymers in the Nuclear Power Industry (Muriel Ferry, Guido Roma, ... Yvette Ngono-Ravache - Pages 545-580)

Volume 4

4.01 - Principles of Corrosion in Nuclear Systems: Theory and Analytical Methods (Robert S. Lillard and Bruce A. Pint - Pages 1-32)

Volume 6

6.01 - Vanadium for Nuclear Systems (Takuya Nagasaka and Takeo Muroga - Pages 1-18)

6.02 - Tungsten as a Plasma-Facing Material (Gerald. Pintsuk and Akira. Hasegawa - Pages 19-53)

6.03 - Graphite and Carbon Fiber Composite for Fusion (Lance L. Snead and Monica Ferraris - Pages 54-92)

6.04 - Radiation Effects in Copper and Copper Alloys for Fusion Applications (Meimei Li and Steven J. Zinkle - Pages 93-113)

- 6.05** - Ceramic Breeder Materials (J.G. van der Laan, J. Reimann and A.V. Fedorov - Pages 114-175)
- 6.06** - Liquid Breeder Materials (Masatoshi Kondo, Teruya Tanaka, ... Tsisar Valentyn - Pages 176-202)
- 6.07** - Beryllium and its Alloys as Neutron Multiplying Materials (Masaru Nakamichi, Jae-Hwan Kim, ... Pavel V. Vladimirov - Pages 203-250)
- 6.08** - Tritium Transport in Fusion Reactor Materials (Masashi Shimada - Pages 251-273)
- 6.09** - Ceramic Coatings for Fusion Reactors (Takumi Chikada - Pages 274-283)
- 6.10** - Radiation Effects on the Physical Properties of Dielectric Insulators for Fusion Reactors (Eric R. Hodgson and Tatsuo Shikama - Pages 284-304)
- 6.18** - Graphite (Johannes Fachinger - Pages 483-502)

Volume 7

- 7.08** - Zirconium and its Alloys: Properties and Characteristics (Raghvendra Tewari, Karri V. Mani Krishna, ... Clément Lemaignan - Pages 284-302)
- 7.09** - Properties of Austenitic Steels for Nuclear Reactor Applications (Philip J. Maziasz and Jeremy T. Busby - Pages 303-318)
- 7.10** - Nickel-Based Alloys (Toshio Yonezawa - Pages 319-354)
- 7.11** - Graphite: Properties and Characteristics (Timothy D. Burchell and Tsvetoslav R. Pavlov - Pages 355-381)
- 7.12** - Neutron Reflector Materials (Be, Hydrides) (Ken Kurosaki and Shinsuke Yamanaka - Pages 382-399)
- 7.13** - Properties and Characteristics of SiC and SiC/SiC Composites (Jacques Lamon - Pages 400-418)
- 7.18** - Basic Properties of Boron Carbide (Dominique Gosset - Pages 539-553)
