The final term in Eq. (33) should be  $\left( \left[ \frac{\partial \bar{\mathcal{L}}}{\partial \mathbf{F}} \right]^T : \nabla \mathbf{F} \right) \cdot \mathbf{F}$ .

Both after Eq. (33), and after Eq. (A17), the text should read “the double contraction involves both legs (one referential and one present) of  $\mathbf{F}$ .”
